### - Biography -

Rebelhead started in 2001 when Jore and Aki got frustrated of playing music that sucks, though this band did not help much in that sense. But the fire was burning deep inside their hearts and this duo decided to start from the most important thing, the name of the band. Little by little they found more players to the band and naturally the line-up got changed few times until the right guys took their places (Aki-vocals, Jore-bass, Mikko-guitar, Erno-drums). All the guys have played before in various bands but for your sake we better not mention those names. Aki had not sang like this before but neither had Jore made any songs earlier so they were quite even in that matter. From the beginning it was clear that plagiarizing was "the thing" for Rebelhead and natural victims for it became their idols, Pantera and Entombed. It took few years to practice without any hurry and after that they recorded few demos which gave them a record deal from Germany. Finnish redneck-metal was born!

### - Fightback -

Rebelhead debut album was recorded in June-July 2005 in Studio Karate, Jyväskylä, Finland. This epic masterpiece does not brag with length but the content is pure metal mayhem. Devoted to their style, Rebelhead goes loud, fast and straight but gives you some time to breath in few slower songs. The audience has already ranked three songs above others, Corrupted chaos, Dreams and Blackrebel station. Album will be released in October.
